Jan 2003 - May 2007

BHP BILLITON | www.bhpbilliton.com

Brisbane & Indonesia Coal Project

Project Manager

Company Profile:

- BHP Billiton is a global leader in the resources industry. Formed from a merger between BHP and Billiton, the company brings together an exceptional mix of quality, low-cost resource assets, complemented by a strong management team determined to operate assets efficiently. The BHP Billiton Brisbane Projects Hub joins an established global network of hub-based management centres in providing the entire business with a world-class, scalable multi-project delivery model.

Key Duties:

- Report to the Project Director, assume responsibility for providing leadership and direction for the delivery of project outcomes within HSEC, schedule, cost and quality criteria for the project.
- Manage project execution, stakeholder engagement and governance processes throughout the project lifecycle including preparation of appropriate project execution plan that will ensure successful project delivery.
- Act as the "point of contact" between the Implementation Contractor and the existing operating facilities to ensure minimal disruption to both operations and construction activities.
- Determine and control of project scope and deliverables including change control management.
- Develop, monitor and control of achievable project schedule.
- Determine and implement quality requirements and improvements in project ensuring deliverables will satisfy the objectives for which it is undertaken.
- Determine required resources to manage project tasks including selection and appointment of resources and development of cohesive project team.
- Review the planned, actual and forecast resource levels for the EPCM Contractor and consultants and challenge the contractor on this where necessary.
- Manage timely and appropriate generation reporting and distribution of project information via formal structures and processes.
- Identify, analysis and mitigation of potential risk events including establishment of risk register and initiation of corrective action when required.
- Travel from Brisbane to Indonesia as required during the study phases and travel frequently or relocate to Indonesia during the execution/construction phase.
